**Filter online threats off your
network**

SOLEDPRO s.r.o.

Whalebone: Characteristics of the service

- Selective DNS translation protection
- Does not replace the EndPoints, Firewalls or IPS security solutions
- Enables DNS translation control without the risk of the provider, faster traffic, outages prevention
- Provides full visibility of communication of all devices in the range, control of communication (access) to domains and reverse audit of DNS traffic, monitoring of unwanted events on DNS, detection of anomalies in DNS traffic, automatic threat blocking and alerting
- **Is focused on the threats of Central European region and the Czech Republic**

Whalebone business benefits

- Secures vulnerabilities, which are not covered by standard cyber security solutions
- Gives the possibility of full control and check of DNS translation without having to rely on the provider
- Saves money with zero / minimum solution management requirements
- Fair business model Try & Buy
